have you ever wondered how one day the media can assert that alcohol is bad for us and the next unashamedly run a story touting the benefits of daily alcohol consumption or how a drug that is pulled off the market for causing heart attacks ever got approved in the first place how can average readers who aren't medical doctors or ph d s in biochemistry tell what they should be paying attention to and what's well just more bullshit ben goldacre has made a point of exposing quack doctors and nutritionists bogus credentialing programs and biased scientific studies he has also taken the media to task for its willingness to throw facts and proof out the window but he's not here just to tell you what's wrong goldacre is here to teach you how to evaluate placebo effects double blind studies and sample sizes so that you can recognize bad science when you see it you're about to feel a whole lot better

for readers concerned about the roots of the public mistrust of science get the book that publishers weekly says is an ardent appraisal of what ails the scientific establishment rescuing science restoring trust in an age of doubt is the product of paul m sutter s long career in the scientific community both inside and outside academia interweaving his own experiences as an astrophysicist with broader trends observed by himself and others sutter roots the current distrust of science within the academic scientific community itself throughout this book sutter reveals a community that has come to disregard the broader public is obsessed with winning grants ignores political landmines limits the entrance of minorities and permits fraud in the pursuit of notoriety sutter tackles these and other issues through the lens of a vicious cycle where public mistrust and misunderstanding of science leads to fewer funding opportunities which leads to more competition within science which leads to a rise in fraud which circles back to greater mistrust each chapter addresses one of the vices the academic scientific community has allowed to perpetuate the sum of which he likens to an illness of the soul of science he also explores the historical context of each issue in order to identify its root causes sutter concludes each chapter by providing actionable solutions for both the nonscientific and scientific communities as well as what he regards as an ideal and healthy scientific approach which will lead to greater public trust

this is the first book length introductory study of the concept of a created scientific controversy providing a comprehensive and wide ranging analysis for students of philosophy of science environmental and health sciences and social and natural sciences

this inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics it is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally the first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject the publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects there is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion the handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context it reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators science educators will be
